

Light-smoke signal (MOB) SOLAS w/ lithium battery

Material no.: 1008636

The light and smoke lifebuoy marker produces dense orange smoke for 15 minutes and features two self contained, inversion switched, LED lights which far exceed SOLAS requirements for output and duration. It is mounted on a ships bridge wing with the bracket supplied and is attached by line to a Lifebuoy. The signal is used to mark the position of a man overboard by day or night. It can be automatically deployed by releasing the attached Lifebuoy, or manually activated.
