

## Multiple Launch, Line Throwing Device, Restech PLT R-230

---

Material no.: 1020222

The Pneumatic Line Thrower (PLT®) R-230 is a multipurpose line thrower. It has a plastic and rubber tipped projectile, Projectile PLT® 150, that reaches 115 meters. It is used for general line throwing to establish a connection between boat to boat, boat to dock or pier etc. The set also complies with IMO SOLAS 74/96. As it uses compressed air to operate it is safe to use in an explosive environment such as petrol or gas. The base unit contains a built-in air cylinder for filling of compressed air up to 200/300 bars (2900/4350psi). This is enough for 4/6 launches before refilling is necessary. The air cylinder is fitted with standard fittings for standard 5/8" threads according to DIN 477.

Four SOLAS projectiles and one 150 Projectile comes with the set. The Rescue Projectiles are made of ABS plastic with aluminium inner tube. The Rescue Projectiles are filled with 240m (263yd) nylon line and can be reloaded and re-used. The 150 Projectile is made of POM-plastic with a rubber tip. It does not carry the line inside but pulls the line from a line box.

### Content:

- PLT® Launching Unit
- Launching Tube R-230
- 4 x Projectile Rescue R-230 complete with lines
- Loading Device
- Launching Tube 150
- Projectile PLT® 150
- Line box with 120m/5mm line (4400N)
- User Manual and USB stick included

Type: PLT® R-230

Launching distance: min 230 m

Line Strength: 2000N

Line thickness: 3.2mm

Recoil: max 5400N

Flight time: approx. 4 sec Approval:

DNV GL MED B and Type Approval,

USCG, DG, CCS, TC and DOT Approval
