

PLT® Multi Restech Pneumatic Line Thrower, PLT® 75

Material no.: 1038608

The PLT® 75 is commonly used for line transfer and increases your safety zone for your equipment and personnel up to 90 meters. Typical operations are; ship to ship, mooring, towing and rescue operations. The set comes with a 5mm polypropylene line that can be launched with a rubber ball reaching 90 meters. The PLT® 75 can be upgraded to comply with IMO SOLAS and gives the benefit of not having an expiry date. For information please contact your nearest Viking Life-Saving station.

As it uses compressed air to operate it is safe to use in an explosive environment such as petrol or gas. The base unit contains a built-in air cylinder for filling of compressed air up to 200/300 bars (2900/4350psi). This is enough for 4/6 launches before refilling is necessary. The air cylinder is fitted with standard fittings for standard 5/8" threads according to DIN 477.
